Lockbox Services

Our lockbox service will maximize your profits by giving you quality service at very low prices. This will enable your employees to focus their time and

efforts on more important things. We provide you the opportunity to outsource your payment processing while maintaining maximum control of the ability to service your customer. We customize our service to fit your exact needs. Our product offering is a blend of wholesale and retail lockbox processing with the ability to support remote capture and various online options.

Markets that we serve are:

Financial Institutions
Municipalities
Corporations
Nonprofits

The Process

The process begins with our triple cut mail openers (on left). This equipment is designed to slice the envelope on three sides, making extraction of contents easy and error free. The operator sorts this work into batches. These batches are then processed on our high speed transports (pictured below) where the stub/document is imaged with the corresponding check. Images of the remittances/documents, checks and all correspondence are captured and available on CD or can be accessed for viewing via our secure website. Our services are tailored to meet the specific needs of the client and we can support any bill, any scan line and any file format.

Additional Benefits

We offer:

- Excellent customer service
- Secure internet access
- Support for credit card payments
- Stop-file processing
- Check and list processing and check only payments
- Support for OCR, MICR and bar code scan lines
- Private labeling available
- Compatibility with any software
- Healthcare revenue cycle management
- Image deposits
